Kaide içerisinde yer alan tüm mekanizmalar zamak malzemeden imal edilmiştir. Profile doğrudan montaj imkânı sunan yapısı sayesinde uygulama sürecini kolaylaştırır. İç ve dış mekân kullanımı için uygun olan sistem, iki vida ile sabitlenebilerek pratik ve güvenli bir montaj sağlar. Yüksek aşınma ve yıpranma mukavemeti ile uzun ömürlü kullanım sunarken, modern çizgileri ve şık tasarımıyla estetik açıdan da fark yaratır.

All mechanisms housed within the base are manufactured from zamak material. Its design allows direct installation onto the profile, ensuring ease and efficiency during assembly. Suitable for both indoor and outdoor applications, the system can be securely fixed with two screws, providing a practical and reliable installation. With high resistance to wear and abrasion, it offers long-lasting performance while standing out with its modern lines and elegant design.

ürme kapılarda tercih edilen bu kol sistemi, kol torkunun önemli ölçüde azaltılması sayesinde geniş ve ağır kanatlarda dahi hafif ve kolay bir kullanım imkânı sunar. Montaj sürecinde zaman tasarrufu sağlayan yapısı, hatalı montajı önleyecek uyumda tasarlanmıştır. Ağır yük hareketi gerektiren uygulamalar göz önünde bulundurularak geliştirilen tasarım, ergonomiyi üst düzeyde tutarak konforlu ve güvenli bir kullanım sağlar.

Preferred for sliding door applications, this handle system significantly reduces operating torque, allowing smooth and effortless use even on wide and heavy door panels. Its design ensures time savings during installation and is engineered to prevent incorrect mounting. Developed with heavy-load operation in mind, the system maintains a high level of ergonomics, delivering comfortable and reliable performance.

Turn-Tilt sistemler için üretilen bu ürün, sabitleme sistemi sayesinde hızlı ve kolay montaj imkânı sunar. İç dişli mekanizması zamak malzemeden imal edilerek aşınma ve kırılmaya karşı yüksek dayanım sağlar. Modern yapısı, şık tasarımı ve ergonomik formu ile hem kullanıcı konforu hem de estetik açıdan fark yaratır.

Designed for Turn-Tilt systems, this product allows quick and easy installation through its secure fixing system. The internal threaded mechanism is manufactured from zamak, providing high resistance to wear and breakage. With its modern structure, elegant design, and ergonomic form, it stands out in both functionality and aesthetics.

Kaidesinde çarklı sistem kullanılmadan üretilen bu tasarım, montaj sürecini önemli ölçüde kolaylaştırır. Profile doğrudan montaj imkânı sunan yapı, kaide ile kol arasındaki bağlantının pim sistemi sayesinde hızlı ve pratik şekilde yapılmasını sağlar. Ergonomik ve şık tasarımı ile kapıların kolayca açılıp kapanmasına olanak tanırken, kullanım konforunu da üst seviyeye taşır.

Manufactured without a geared system in its base, this design ensures a significantly easier installation process. Its structure allows direct mounting onto the profile, while the pin-based connection between the base and the handle enables quick and practical assembly. With its ergonomic and elegant design, it allows smooth opening and closing while enhancing overall user comfort.

Profillerin işlenmesini kolaylaştıran ayarlanabilir delme şablonu sayesinde montaj süreci pratik ve hassas bir şekilde gerçekleştirilir. Tüm montaj gereksinimlerini karşılamaya imkân veren sabitleme sistemine sahip olan menteşe, hem içe hem de dışa açılan uygulamalar için uygundur. Üç boyutta ve birbirinden bağımsız mikrometrik ayar imkânı sunan yapı, kanat takılı olsa dahi gerekli ayarlamaların yapılabilmesini sağlar.

Thanks to its adjustable drilling template that facilitates profile machining, the installation process can be carried out quickly and accurately. The hinge features a fixing system designed to meet all installation requirements and is suitable for both inward and outward opening applications. Offering independent micrometric adjustment in three dimensions, the system allows precise adjustments even when the sash is already installed.
